UCSF TODAY & TOMORROW

SAT. APR. 23 - FRI. MAY 4 VOL. 2 NO. 14 UC-SAN FRANCISCO

Honors & Awards

WALTHER STOECKENIUS, Prof. Cell Biol.: Named the UCSF 1977 Faculty Research Lecturer. Title was given by the Academic Senate in recognition of his outstanding research achievements, particularly based on his important work done on the campus for the past ten years. For two decades he has been a leader in the study of the structure and function of biological membranes. Using electron microscopy, X-ray diffraction, biochemical characterization and mathematical modeling, with ingenuity and imagination, he has made basic contributions to our understanding of how membranes are constructed and how they work.

JOHN W. SEVERINGHAUS, Prof. Anes.: Recipient of the 1977 Ralph M. Waters' Award. Presented to an outstanding anesthesiologist, physician, or scientist who has contributed substantially to the progress of anesthesiology.

JULIUS KREVANS, Dean, Schl. Med.: Recipient of Mastership from the Board of Regents of the American College of Physicians at their annual meeting in Dallas on April 18 honored him as a "skilled physician, a loyal member of the College, a leader in internal medicine and a policy-maker in medical education."

OSCAR LIONEL FRICK, Dir. Allergy Immunol. Res Lab.: Named President of the American Academy of Allergy for 1977. Announcement made during the American Congress of Allergy and Immunology meeting in N.Y. City, March 29.

Almanac

DONALD R. POULTON, Prof. & Chrmn., Dept. Orthodontics: Presented a three-day course to the Assoc. Sassouni pour le Progress de l'Orthopedic Dento-Facial on April 16-18 at Alpe d'Huez, near Grenoble, France ... BERNIE ZILBERGELD, Dir. Men's Counseling Training, Human Sex. Prog.: Spoke at the California State Psychological Assoc. Convention, March 12. Title was "Sex Therapy and the Concept of Conditions" ... Also spoke at Stanford U. Schl. Med. on Historical Derivation of our Sexual Values with HARVEY CAPLAN and REBECCA BLACK, both of Human Sex. Prog. on March 29 ... THOMAS K. HUNT, Prof., Surg. & Amb/Comm. Med.: Delivered welcoming address at the National EMS Manpower Symposium, May 4-5, Hyatt Regency, S.F.

News Briefs

Four San Franciscans received the prestigious UCSF Medal for Distinguished Service on April 18 at a formal dinner given by Chancellor Francis A. Sooy at the Bohemian Club. Attending were 75 distinguished guests. Recognized for their service were: Cyril I. Magnin, 77, business executive and community leader; Idaree Westbrook, 53, community relations leader; Helen Nahm, 75, former Dean UCSF School of Nursing; and Edward B. Shaw, 82, former Chairman Pediatrics Department UCSF. Guests included UC President and Mrs. David Saxon; former UC President and Mrs. Charles Hitch; former City Chief Administrative Officer and Mrs. Tom Mellon; Mr. and Mrs. Gardiner Johnson; Assemblyman and Mrs. Willie Brown; and UC Regents William Coblentz and Joseph Moore and spouses. UCSF created the Distinguished Service Medal Awards three years ago to replace the customary Honorary Doctorate Degree. It is awarded to individuals for their service to the community in the fields of health care education and patient care in the Bay Area.

A one-day Health Fair is set for Saturday, May 14, 10 a.m. to 5 p.m., at Laguna Honda Elementary School playground, Seventh Avenue near Irving Street. This will enable UCSF, health care agencies, and community residents to get better acquainted. The Fair is planned in conjunction with National Hospital Week, according to Tony Wagner of Hospital Administration, and is planned to let the community know what health care resources are available at UCSF and the neighborhood. Entertainment throughout the afternoon will be provided by UCSF singers, dancers and musicians, including John Conte, Director of Emergency Services, and the San Francisco Jazz, a four-piece jazz combo.

Dedication of the Featherstone Reading Room, formerly the Pharmacology Department Library, is planned for the morning of Wednesday, May 4, 11:30 a.m. The dedication will be by E. Leong Way, Chairman, Pharmacology and Experimental Therapeutics, in the presence of Mrs. Featherstone, members of the Department, and special guests who will pay homage to Dr. Robert Marion Featherstone as a scientist, teacher, former President of the UCSF Academic Senate, and president of national and international pharmacological societies. Guests will include Capt. Albert Benhke, USN Retired; Stuart Cullen, professor emeritus of Anesthesiology, Donald Lucas, professor of Orthopaedic Surgery, and Dr. William O. Reinhardt, Associate Dean of the School of Medicine and professor of Anatomy. Dr. Featherstone served as department Chairman from 1957 to 1973 when he resigned to return to teaching and research.

The Director of the Office of Information Systems, John A. Starkweather, has resigned as of June 30 to return to fulltime instruction and research as Professor of Medical Psychology in the Department of Psychiatry. Dr. Starkweather served as Acting Director from 1964 and from 1967 as Director. During his service, he developed the unit from a small campus computer facility to a major center serving a large number of diverse academic and administrative uses. Because of changing needs, Chancellor Sooy announced, it has been decided to divide the Office of Information Systems into two separate units as of July 1. Joseph B. Yeaton, currently Chief, Division of Computing Services, will be Director of the Computer Center, including its consulting services; and a Director of Administrative Information Systems will be recruited to head the unit formerly called the Division of Management Systems. Both units will continue to report to the Chancellor through Vice Chancellor Erickson.

A Guggenheim Fellowship for 1977 has been awarded to James A. Spudich, associate professor of Biochemistry, Department of Biochemistry and Biophysics. Dr. Spudich and his colleagues have been studying the molecular basis of how eukaryotic cells move and change shape. The Guggenheim Fellowship will support Dr. Spudich for six months of research devoted primarily to structural analysis of cellular elements involved in cell movement. Guggenheim fellowships are awarded on the basis of "demonstrated accomplishment" in the past and "strong promise" for the future. This year, the 53rd annual John Guggenheim Memorial Foundation awarded a total of $4,602,000 to 313 scholars, scientists, and artists chosen from among 3,050 applicants throughout the U.S. and Canada.

Screening sessions by the Northern California Tay-Sachs Disease Prevention Program will be held on Wednesday, May 4, from 3:30 to 6 p.m., in the Madrone Room of Millberry Union. Tay-Sachs is inherited, invariably fatal, and occurs most frequently in children of Jewish ancestry. Tay-Sachs is a recessive genetic disorder which develops in infants before birth and attacks their central nervous system. Since both parents must possess the gene before a Tay-Sachs baby can be born, the disease can be prevented by genetic screening. A simple blood test indicates carriers, and through genetic counseling, couples "at risk" have a number of options whereby they can safely plan to have children.
